## Professional Summary

Results-driven software engineer with 5+ years of experience in designing, developing, and maintaining scalable web applications. Adept at collaborating with cross-functional teams to deliver innovative solutions. Passionate about learning new technologies and optimizing performance.

## Work Experience

### Software Engineer - XYZ Tech Solutions (2020-Present)

- Developed and maintained web applications using JavaScript, React, and Node.js.
- Improved application performance by 30% through optimized code and database queries.
- Collaborated with designers and product managers to enhance user experience.
- Implemented CI/CD pipelines, reducing deployment time by 50%.

### Junior Software Developer - ABC Innovations (2017-2019)

- Assisted in the development of backend APIs using Python and Flask.
- Wrote unit tests, improving test coverage by 40%.
- Supported database migrations and optimization, enhancing data retrieval speed.
- Researched and implemented new technologies to streamline development processes.

## Education

### Bachelor of Science in Computer Science - UC Berkeley (2017)

## Skills

- Programming: JavaScript, Python, Java
- Frameworks: React, Node.js, Flask

- Tools: Git, Docker, Jenkins
- Databases: PostgreSQL, MongoDB
- Cloud Services: AWS, Azure
- Agile & Scrum Methodologies

## **Certifications**

- AWS Certified Solutions Architect
- Google Professional Cloud Developer

## **Projects**

### **E-Commerce Platform Optimization**

- Led a team of 4 developers to enhance an e-commerce website, improving load times by 40%.
- Integrated a recommendation engine using machine learning models.

### **Chatbot Development**

- Designed and developed a chatbot using NLP to assist customer inquiries, reducing support tickets by 25%.

## **Additional Information**

- Volunteer mentor at a local coding bootcamp.
- Speaker at tech meetups and conferences on web development best practices.
